- Concierge service
- 24 hour monitoring center
- Geo-fence
- Vehicle track and trace
- Monitor up to three types of inputs
- No external connections or antennas
- Email reporting of violations

[A New Age](#)

Until now, personal vehicle tracking has been an expensive service, within the means of only a small percentage of people. The Seeker locator changes all that, as the world's first truly affordable and highly reliable mobile tracking device.

[Power Options Deliver Extended Performance](#)

The Seeker locator can operate for up to 90 days on a set of four AA batteries during normal use with good GPS visibility. Easy to access batteries provide simple and low-cost maintenance. The device can be connected to external power by using the optional vehicle adapter module.

[Expanded Capabilities](#)

The Seeker locator's capabilities can do on-demand locating and scheduled reporting. These new features can be used in combination with other Seeker capabilities to satisfy the requirements of virtually any vehicle track and trace.

[Improved Mapping](#)

Our new mapping is excellent and covers anywhere in Canada and the USA. We can set Geo-fences on the map and if a vehicle goes in or out of the area you will receive an email or a phone call if you do not have email, notifying you of the event.
